

INTRODUCING PERMA LIP IMPLANT

One of the greatest challenges in plastic and cosmetic surgery of the face has been the search for an exceptional solution to tissue augmentation. Past methodologies, both temporary and permanent, have met with disappointing results for both physician and patient alike.

Temporary solutions typically involve the use of commercially produced fillers which can be unpredictable with respect to how long they last, and require repetitive treatments that are painful, inconvenient, and costly to the patient.

Permanent solutions have relied on implants that, due to their surface characteristics, can promote tissue ingrowth resulting in a restriction of movement.

Dr. Moneer Jaibaji is proud and excited to introduce Perma Facial Implant, the safe, definitive solution for permanent soft tissue enhancement of the face. Perma Facial Implant is a patented, FDA approved device and has undergone extensive clinical testing to ensure its safety and efficacy. This is an in office procedure.

Contact our office for a free Consultation 619/522-0821. Bring in this letter to receive \$250.00 off the procedure.

Moneer Jaibaji, M.D.
Board Certified Plastic Surgeon
Diplomat of the American Board of Plastic Surgery
801 Orange Ave, Suite 204
Coronado, CA 92118
